

## ***MEMPHIS ZOO GARDENS and FARM***

**2000 Prentiss Pl  
Memphis, TN 38112**

The Memphis Zoo has a variety of gardens and landscaping features. There are natural habitat landscapes in the animal enclosure areas, public gardens in the walkways, many container gardens, trees, native plants and annuals. The summer butterfly exhibit and the Kids Farm area both have display and container plantings. The Kids Farm also has a vegetable garden, combo container gardens, and a water garden, a wonderful place for children to learn about gardening and see where the vegetables they eat come from.

Each spring, the Memphis Zoo holds a very popular Spring Plant Sale. Sale items are cuttings and seedlings grown in the zoo greenhouse.
