

## ***RECYCLE RIGHT***

Recycle Right is a program that enlists Master Gardener volunteers who teach and share the knowledge of Recycling Right from composting through Hazardous Waste.

Each April and November we have Recycle Right Weekend, Saturday and Sunday, on Moore Road just south of the Agricenter where we teach how to compost and recycle, appropriate techniques to use, and what goes where. We take surveys during

the weekend to encourage local politicians to increase recycling awareness, and we also monitor the recycling containers during that week.
